

Developing Math Concepts in Pre-Kindergarten

Target Audience: Pre-Kindergarten Teachers, Administrators, and Math Specialists

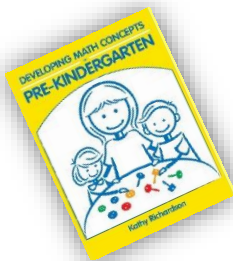

Date: Wednesday, October 17, 2018, 8:30 am-3:30pm (Registration & Breakfast at 8:00 am)

Registration: \$25.00 (Breakfast, lunch, materials included)

Join us for a one-day, hands-on workshop that focuses Pre-K teachers on how to create a positive environment that supports the learning of mathematics.

During the session you will:

- Gain knowledge of how mathematical ideas in a Pre-K environment are investigated through play, active participation, and intentional learning tasks.
- Learn to utilize questioning techniques to promote mathematical thinking.
- Learn to provide appropriate experiences that encourage mathematical development and understanding.
- Gain strategies to differentiate instruction to meet the range of needs in your classroom.

Each participant will receive a copy of
Developing Math Concepts in Pre-Kindergarten

For each key math area (Numbers, Geometry, Sorting/Classifying, Pattern, Measurement, and Data Collection), activities are provided for circle time, small group, and individual instruction.

"Big Ideas" are presented, making it clear to teachers what the appropriate expectations are for Pre-Kindergarten students.

**** Limited to 40 Participants ****

Location: ODU Tri-Cities Center, 1070 University Blvd, Portsmouth, VA 23703
